**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Norris (U.S. Patent number 5,990,837).

Regarding claims 1 and 12, Norris discloses a wireless access point comprising:  
radio circuitry (24) for exchanging an electronic network signal with a wireless signal;

an antenna system (20) for sending and receiving wireless signals with a mobile client, the antenna system further comprising:

a plurality of antenna elements (65) for providing a respective plurality of communications signals over a wireless channel; and

an isolating structure (23), selectively positioned with respect to the antenna elements, for selective varying signal isolation between the respective antenna elements (Figs. 2-8, col. 4, lines 10-65).

***Allowable Subject Matter***

3. Claims 2-11 and 13-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art teaches the antenna system wherein the isolating structure is adapted to selectively vary signal isolation so as to switch between a sectorized antenna configuration and an antenna array configuration, and wherein the isolating structure is a removable structure, selectively received in a socket co-located with respect to the antenna elements.
